Rémy Eudeline, biology teacher, lives and works on Mayotte (Comoros) since 2014

- 120 species + detailed descriptions
- with high quality photographs
- bilingual English/French
- EN FR e-book also in German

Indian Ocean Field Guides THE COMOROS

The first ever field guide on the Comoros!

The Seychelles, Mauritius, Réunion – these and many other islands in the Indian Ocean are popular among travellers for their stunning natural beauty and among naturalists for their peculiar fauna. Unfortunately, there are **hardly any field guides available**.

The first book of our series will come out in 2017 and will cover the **Comoros**, an archipelago **little known** among travellers and poorly studied by scientists.

We plan to self-publish and are therefore searching for supporters! We invite you to **visit our website** or write us to pre-order books or **join the crowdfunding campaign**.

Tourists

Presents all common species – an experience for the entire family!
